The Varanda Network
Invest. Trade. Partner.

The Varanda Network connects academia, industry, government and civil society to advance innovation and create economic opportunity.

Connecting research, talent and opportunity

Research & innovation
Connect academic expertise with practical challenges and opportunities for applied research.

Strategic partnerships
Build connections across sectors and markets to support collaboration and knowledge sharing.

Talent & workforce
Bring educators and employers together to support student experience and career readiness.

ACADEMIA

Research. Partnerships. Possibility.

We work with universities, colleges and research institutions to connect research and talent with industry needs and help bring concepts to market.

We connect your research, expertise and talent with industry by:

Research partnerships
Facilitate joint R&D; projects aligned with industry needs and academic strengths.

Applied research opportunities
Identify practical challenges that academic research can help address.

Funding opportunities
Identify relevant funding to support collaborative research and innovation.

Commercialization connections
Connect researchers with partners to develop, test and bring concepts to market.

Research visibility
Communicate your expertise, facilities and capabilities to prospective partners.

Internships & co-op placements
Build employer partnerships that create practical learning opportunities.

Industry-informed learning
Connect educators with industry insights to inform curriculum development.

Graduate career readiness
Support connections that help students gain experience and professional networks.

Domestic & global connections
Facilitate introductions, partner meetings, delegations and site visits.

Lasting collaboration
Strengthen relationships that support knowledge sharing and mutual growth.
